Comment
- Far too much time was spent on proofs, with little to no examples that also did not reflect the test questions. However, I did learn quite a lot from the professor's explanations.

Student Comments
I really liked how you provided us with many resources throughout the course such as informative slides, PSTAT 120A review document, relevant HWs, practice exams, a discord server, and solutions to everything. I also found OH and review sessions to be extremely helpful because of your friendliness and willingness to answer any question. I also liked how the course was continuously updated, for example, if we didn't go over something in lecture, you would remove it from the HW. I also liked that the HW/lecture/practice exams were really relevant to exams. Thank you for the great quarter!
Exams/Quizzes are weighted at 80% of the course grade. This is too high, it's unbelievable. Lecture slides are too long, did not utilize the textbook, an emphasis needs to be on textbook material. Too much theory based, unable to understand simple and direct questions. Summer Session (6 weeks) made this class undoable.
I really enjoyed taking this class and how the content was approached and taught. I did not have a good experience with 120A but this class completely changed how I approach statistics.
Probably one of the best PSTAT instructors that I had. Really good examples were given in lectures. Course materials are very interesting. HW questions are carefully crafted/chosen from the textbook since they are all very interesting to do.
I love how enthusiastic Ethan is about teaching! He is very energetic and works hard to engage the class. However, I think his tests were not at all representative of what we were learning. I always felt pressured under the time limits to figure out seemingly new material with an "easy trick" that he expected us to just "get" intuitively.
